WS8395	Silver Nitrate Sticks	Indications for use by nurses: to reduce exuberant hypergranulation tissue in wounds or around percutaneous tubes, to reduce granuloma tissue in wounds, to stop bleeding from a raw area, particularly useful after paring callous, to stimulate static wound edges in chronic wounds. You may expect that there will be increased drainage x 24 hours. Precautions - AGN03 must NOT be used to stop bleeding if the treated area is in a wound - it can cause considerable damage. Choose to use a calcium alginate dressing instead.	15 cm	Each	AMG	Silver Nitrate Sticks	118-395	15
