

VAC Unit Instructions

Your doctor or wound care nurse has ordered a VAC (vacuum assisted closure) unit for you to use at home and will decide when your VAC treatment is over.

- If your VAC unit is beeping or malfunctions, please contact your nursing provider at the number below.
- If you are admitted to hospital or any healthcare facility during treatment, please contact your nursing provider to advise where your VAC unit is located.

Nursing provider: - -

Once treatment is complete:

1. Contact your nursing provider. Your nurse will arrange for the unit to be picked up from your home, hospital or other healthcare facility.
2. Remove and dispose the canister if your nurse has not already done so.
3. Pack up the unit, ensuring all pieces are included:
 - VAC unit
 - Protective hard case
 - Fabric carrying pouch
 - Charging cable (2 pieces)

If you have any questions or concerns regarding your unit, contact your nurse or the Home and Community Care Support Services Supply Department. **1-888-447-4468 ext. 7400**
