To register, call: 1-800-445-1822
www.ontario.ca/healthcareconnect

Before you begin

Step 1
Make sure you have a valid Health Card.

Step 2
Make sure you are not already enrolled with a family doctor.
Health Care Connect assists people in finding a family doctor or nurse practitioner.

How does Health Care Connect Work?

The program refers people without a regular primary care provider to family doctors and nurse practitioners who are accepting new patients in their community. If you don’t have a primary care provider, you can register for the Health Care Connect program by calling 1-800-445-1822.

Your Care Connector and You

Once you’ve registered with Health Care Connect, a Care Connector will be assigned to help you find a family doctor or nurse practitioner in your area. Your Care Connector will be your main point of contact for this process. Their contact information will be mailed to you after you’ve registered with the program.

Be sure to get in touch with your Care Connector if your contact information or health changes.

Your Roles and Responsibilities

Health Care Connect assists you with your search for a family doctor or nurse practitioner. You need to have a valid OHIP card to be part of the program.

Health Care Connect is here to help, but it doesn’t guarantee that a primary care provider will be found. You should also continue looking on your own. Be sure to contact your Care Connector if you move, find a primary care provider on your own, or if your health changes.
