

Medical Supplies Equipment Patient Information & Depot List

Supporting Your Care

Your home care team is committed to supporting you with a care plan that provides access to services, supplies and information to help you meet your care goals.

If you are receiving care from a nurse or therapist, you may also need medical supplies or equipment to support you with your treatment plan (e.g. supplies for wound dressings after surgery, walker to make sure you transfer from hospital to your home safely).

Some items may be provided until the treatment goal has been met (e.g. until a wound has healed). Items such as walker or a wheelchair may be provided for a short period of time to support patients until alternate arrangements can be made. Patients and caregivers will be informed of the options available to them for items required over the long term.

Getting your Medical Supplies and Equipment

Your home care team will identify the supplies you need to support your care and have them delivered to a depot location chosen by you **at no cost** (See reverse for a list of Depots in your region). Your Care coordinator or nurse will share the various options for Depot locations available to you and CCAC staff can also provide information about options for direct delivery to your home.

Home delivery occurs for IV Therapy, medications and equipment. If you are receiving wound care at the same time, supplies can be delivered with the IV/medications. Once IV Therapy has been completed, supplies will be directed to a depot of your choice.

Equipment such as IV poles, infusion pumps or walkers are delivered at no charge.

Important Information

- Please ensure that you or your designate pick up your order at your selected depot as soon as possible as the supplies will be required for your treatment visits.
- You may choose to change the pick-up location at any time, provided you notify CCAC in advance and you have picked up all of your previous supplies at the original depot.
