### POSITION SUMMARY

The Nurse Practitioner is responsible to provide in-home palliative services for patients living within a designated geographical area.

### KEY RESPONSIBILITIES

- Manages the delivery of coordinated quality palliative care programs in a designated geographical area.
- Manages an inter-professional model of palliative care.
- Provides patient assessment, diagnosis, treatment, pain and symptom management to patients in a specific area.
- Develops initial palliative assessment which includes assessing home environment, supports available in the home, level of health, goals and expectations related to end of life care. Assessment may include applications for hospice.
- Develops collaborative relationships with HCCSS stakeholders, physicians, coroners, hospital palliative staff, hospice staff and other.
- Improves the quality of life of terminally ill individuals, and their families, by giving them the choice to receive care in their home.
- Maintains relationships with professional organizations to ensure quality of care knowledge is current.
- Manages complex and difficult patient issues which cannot be handled in a routine manner.
- Establishes and maintains effective relationships with service providers to deliver quality palliative care.
- Participates in the teaching and coaching of family members to support them with end of life issues.
